

TOTAL WATER MANAGEMENT

TRUST THE WATER EXPERTS.

Make managing your water easier and more cost-effective than ever before. As your end-to-end custom water treatment solutions provider, you can count on our team of Pentair® water experts and network of service providers to help support your water-using equipment needs.

Simply put – we offer water expertise and peace of mind.

PROTECT YOUR WATER AND YOUR BUSINESS.

It is essential to consider the impact water can have on your equipment, products, customers and success. The chemical characteristics of water affect the quality and consistency of beverages, operating efficiency, and life of equipment. In many cases, water can be the cause of expensive repairs, shortened equipment life and poor beverage quality.

Industry-leading manufacturers of ice machines, combi ovens, coffee brewers and espresso machines state that **up to 75% of equipment problems are water-related, and not covered under warranty.** These problems can be reduced or avoided with the right water treatment system and supporting total water management program. The benefits are proven, and the results are measurable.

WE POUR OUR EXPERTISE IN WATER PURITY

At Pentair, we care about the integrity of our solutions and what that means to your customers and to your business. Still, we want to make your job a little easier. From selecting the right solution to installation and through its lifespan, we remove the guesswork and replace it with peace of mind.

5 easy steps to Total Water Management

Pentair water filtration service supports your business.

Peace of mind.

Your water and your business can run smoothly and safely.

WE DO WATER, SO YOU CAN DO WORK.

No time to worry about water? ***We do that for you.***

Don't know why you need water treatment? ***We analyze and show you why.***

Need a single, capable and consistent supplier that fits your business needs? ***That's us!***

Need solutions customized for each location? ***That's what we do!***

Need your equipment to run efficiently at all times? ***That's what TWM is all about.***

PROTECTING YOUR EQUIPMENT, YOUR CUSTOMERS, AND YOUR BOTTOM LINE.

Anyone who receives water from a local water treatment facility can benefit from the Pentair® Total Water Management Program. Although municipal water treatment facilities treat water to United States Environmental Protection Agency standards, there may still be characteristics of your water that can negatively impact your foodservice equipment and beverage quality. Pentair Total Water Management guarantees you have your appropriate system installed correctly and regularly maintained.

LOWERING YOUR TOTAL COST OF OWNERSHIP MEANS INCREASED PROFITABILITY AND CUSTOMER SATISFACTION.

Water related costs can stack up quickly effecting your bottom line. Potential savings grows exponentially when you identify and filter all your water using foodservice equipment.

Save with Total Water Management.

TOTAL COST OF OWNERSHIP

Reduce scheduled and unscheduled maintenance

Minimize planned preventative maintenance, reduce unscheduled 'break & fix' costs, and reduce time spent on daily cleaning procedures with equipment.

Avoid productivity loss due to equipment downtime

Assess overall costs associated with water-related equipment downtime - lost revenue, service interruption, unscheduled maintenance, ice delivery, lost sales, and customer dissatisfaction.

Improve asset performance

Reduce energy consumption, and improve equipment reliability and product consistency. Prevent scale from drastically increasing energy consumption with combi/steam ovens and espresso equipment, and it reduces ice production time.

Extend asset life

Significantly improve the condition and useful life of equipment by minimizing scale and corrosion, and avoid the use of harsh cleaners. Measure and benchmark the life-cycle and replacement costs for each type of equipment.

Increase customer satisfaction

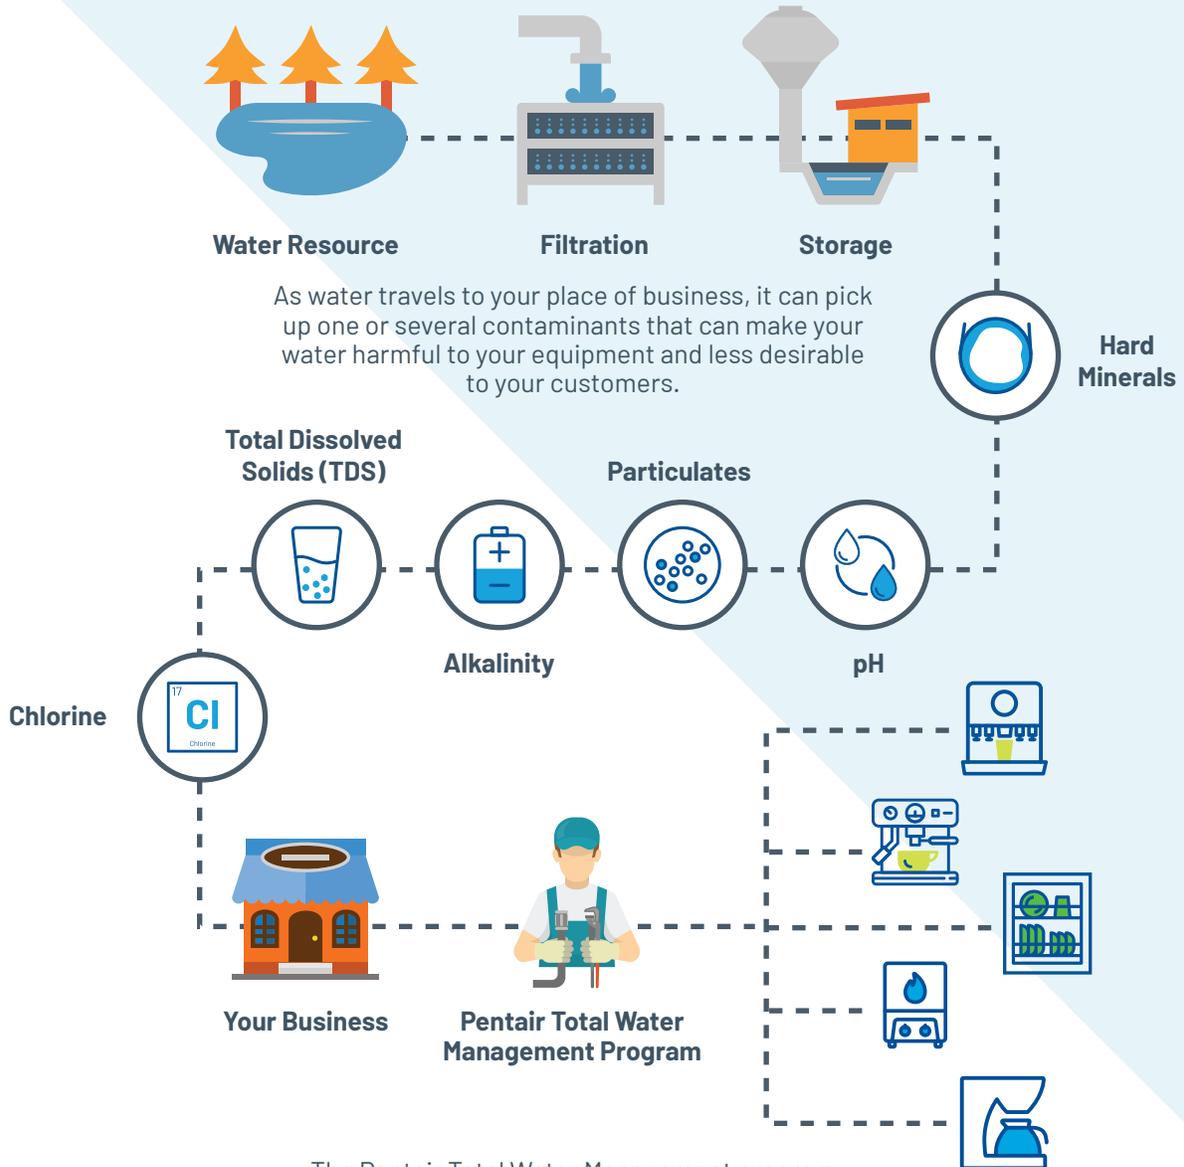

Overall aesthetic benefits of water treatment improve beverages with reduced taste and odor, and consistent, predictable quality keeps them coming back for more.

Reduce operating costs / control spending

Quantify the combined financial impact of the water treatment program in terms of operating cost reduction, minimizing spending (i.e., downtime associated costs), productivity and operating efficiency, and customer satisfaction.

THE WATER TREATMENT JOURNEY

The Pentair Total Water Management program protects your business from harmful contaminants saving you time and money.
