

YOU KNOW WHAT'S IN YOUR RECIPES, DO YOU KNOW WHAT'S IN YOUR WATER?

Whether you have a restaurant, grocery store, coffee shop, or any other foodservice operation, water runs through your water-using equipment, and can be a vital ingredient in your end product. It's in your recipes. It's in your beverages. It's in your ice. So, the important question to ask then is, what's in your water? After all, it's not just your reputation at stake. It's your livelihood.

Is it time to have your water analyzed?

If the water tastes bad or smells bad, there's scale buildup in the pipes, around fixtures, in appliances, or if you see an increase in your utility bills. It's time to have your water analyzed.

Minerals, municipal disinfectants and metal particles can impact your water quality, while scale buildup can lead to equipment downtime, increased service costs, even warranties being voided. It may not even be apparent that quality is fading until your equipment breaks down or customers start complaining.

LET OUR WATER EXPERTS ANALYZE YOUR WATER AND OFFER SOLUTIONS.

Starting the process is simple. Get a Pentair® Everpure® Test Kit. Fill out the enclosed form, collect a water sample, then send it back to our lab. Easy as that.

The Pentair Water Lab will test your sample and compare the results to industry standards. Then, our water experts will analyze the lab report and provide recommendations tailored to your operation's unique needs, including suggestions for proper filtration solutions, as well as other water management products and services. We will help you better understand your water quality and process limitations while discovering opportunities to elevate your water treatment plan.

Whether you have one location or you're nationwide, Pentair offers a turnkey, start-to-finish Total Water Management™ (TWM) Program for your convenience. We're a one-stop, all-under-one-roof water management company. Since the same water experts test, recommend, install, and service the entire water treatment process, you'll rest assured your water quality needs are covered.

Be clear about your water.

To sign up for a Pentair Everpure Water Analysis, connect with your local Pentair dealer, or visit pentair.com/twm.

Let Pentair Water Experts remove the guesswork and replace it with peace of mind!
